

Aggregates

Aggregates include a full line of graded stone in various sizes, as well as sand and gravel. Aggregates have a broad range of uses, from road base to rail beds, and are a key ingredient in concrete and asphalt.

| <u>Granular Fill Materials</u> | <u>Base Materials</u> |
|--|---|
| <p>Pit Run</p> <ul style="list-style-type: none">· mined straight from the bank in the pit· used for backfill or in road base | <p>Base is a key part of road and driveway construction.</p> |
| <p>Screened Sand</p> <ul style="list-style-type: none">· processed sand; free from stones and organic materials· used for pipe bedding and slab work | <p>A Base (approx. 19mm-25mm)</p> <ul style="list-style-type: none">· great compaction· meets most city and provincial specifications· used for road construction, driveways and slab work |
| <p>Fill Sand</p> <ul style="list-style-type: none">· may contain small rocks· used for basements, garages, horse arenas and gardens | <p>C Base (approx. 75mm)</p> <ul style="list-style-type: none">· main use is base material for road work· sometimes used in backfill projects |

Specialty Products

Specialty Products are designed to meet today's specialized construction applications. We are able to provide a variety of products to meet the specific needs of customers.

Crushed Granite

- mainly used as landscaping rock
- also used around electrical areas (low conductivity properties)

Drainstone (12.5mm-19mm) 1/2" - 3/4"

- mainly used for tank backfill, playgrounds and dog runs
- has excellent drainage properties

Pea Gravel (12.5 - 20mm) 1/2" - 3/4"

- mainly used as tank backfill and in dog runs
- used as landscaping rock

Rip Rap (as specified)

- used for riverbank stabilization

Boulders (150mm - 600mm)

- used as landscaping rock

Limestone

Limestone Materials include a full line of crushed stone in various sizes.

Limestone Materials can be categorized as being either DOWN or CLEAN.

Limestone Materials have a broad range of uses, from road base to road toppings, and backfill.

| <u>Limestone Materials</u> | <u>Down and Clean Limestone</u> |
|--|---|
| <p>¾" Down Limestone</p> <ul style="list-style-type: none">· crushed limestone material· excellent compaction properties· most often used in road construction, driveway construction and repair and as driveway and road topping <p>2" Down Limestone</p> <ul style="list-style-type: none">· crushed limestone material· used for road base,· used for driveway, parking lot and building slab base <p>4"-6" Down Limestone</p> <ul style="list-style-type: none">· larger crushed limestone material· used for backfill | <p>DOWN</p> <ul style="list-style-type: none">· compacts well because of dust and fines in the material <p>CLEAN</p> <ul style="list-style-type: none">· no dust or fines |

Specialty Products

We are able to supply a variety of products to meet the specific needs of customers.

Clean Limestone (12.5mm-19mm) ½"- ¾"

Limestone Rip Rap (as specified)

- used for riverbank stabilization

Limestone Boulders (150mm – 600mm)

- used as landscaping rock
